The Stat-X First Responder®

The Stat-X First Responder® is a new and innovative tool designed to aid in the suppression of fires and for use as a personal protection device for fire fighters in emergency egress or entrance situations. It is physically and functionally similar to a smoke grenade with the major difference that it delivers a highly effective aerosol fire suppression agent called Stat-X.

When would I typically use it?

Scenario A - Firefighter arrives at the scene of an early stage fire. After assisting in getting people out and before additional resources arrive at the scene, toss Stat-X First Responders into the rooms which are involved with the fire. This will buy time for further rescue and for the firefighters to lay hose.

Scenario B - Firefighters are concerned about potential flashover from a fire down a hall and water isn't yet available. Toss Stat-X First Responders ahead of the firefighters to eliminate many of the contributing factors of a flashover.

Scenario C - A firefighter is trapped or can't get to a victim due to an intense area of fire. Toss a Stat-X First Responder into the flame area for immediate fire suppression.

Applications:

- High Rise Building Fires
- Confined Space Fires
- Below Grade Fires
- Electrical Vaults
- Shipboard Fires
- Bilge Fires (Activates & deploys under Water)
- Vehicle Fires
- Attic Fires
- Shipping Containers
- Before Hoses are in Place
- Rapid Entry Teams
- Rapid Temperature Drop
